BUSINESS HIGHLIGHTS

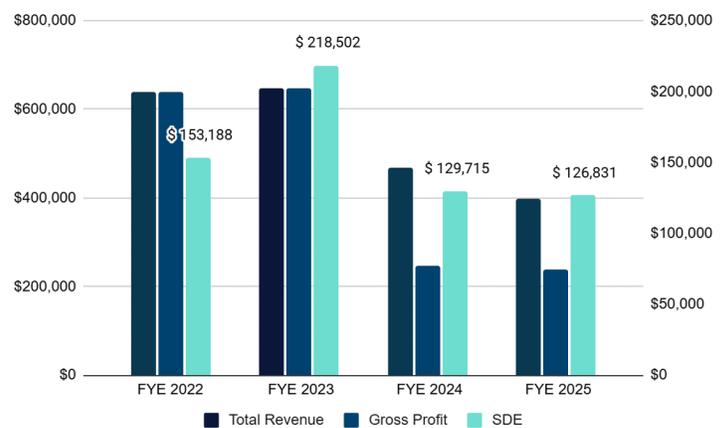

This well-established boutique medical aesthetics practice has served an affluent Central Florida submarket since 2013, delivering natural-looking results delivered in a personalized, professional setting.

Services are anchored by injectable wrinkle-relaxer treatments (e.g., Botox/Dysport) and dermal fillers, supported by skin rejuvenation services such as light-based skin treatments, and RF microneedling.

A licensed Physician Assistant provides care under medical director oversight, with a defined short-term transition period available to support continuity through an ownership change. With staff indicating a willingness to remain after closing, continuity can be maintained through the handoff and training period. This profitable medical spa located in an affluent market with strong demand for aesthetic services, is ideal for a strategic buyer seeking geographic expansion.

- **Referral Driven Demand:** Steady word-of-mouth and repeat maintenance visits support consistent appointment flow from long-term returning clients.
- **Recurring Treatment Demand:** Over 60% of total sales comes from Botox, reinforcing recurring visits tied to routine upkeep.
- **Turnkey Clinical Facility:** Professionally built-out space, three treatment rooms and a polished reception area.
