

Precision Manufacturing Facility

This precision manufacturing facility is a strong acquisition opportunity in specialized metal products. Founded in 2010 and acquired by current ownership in 2024, it has been repositioned as a full-service precision manufacturer serving critical industries nationwide.

The facility manufactures precision components and molds for plastic injection and aluminum die casting using advanced EDM and wire cut machinery. It holds

ISO 9001:2015 certification, is undergoing an AS9100 Rev D external audit, and is fully ITAR compliant.

Operational Excellence:

The company operates as a full-service precision manufacturer with strong quality assurance protocols. Each component is inspected and measured before assembly or shipment to meet exact specifications. Its turn-milled parts serve aerospace, automotive, energy, medical, and oil and gas markets.

Market Position:

The business serves federal agencies, defense contractors, and commercial customers. Its current defense contract portfolio totals \$1,500,000, with additional bids underway, showing strong defense-sector positioning.

Strategic Advantages:

Its one-stop service model supports multinational customers with productivity, flexibility, and advanced manufacturing solutions. A strong U.S. customer network has helped build long-term partnerships based on quality and reliability. This facility offers significant growth potential in established markets, backed by key certifications and a record of serving demanding, quality-focused industries.

2025 Revenue: \$1,556,281

FF&E: \$682,206

2025 EBITDA: \$304,564

Inventory: \$5,000

Asking Price is \$1,600,000 USD

The current owner never intended to sell this business so soon but personal family preferences is leading him to move out of state. However, he is 100% committed to explosive growth and wants to get an additional \$3,000,000 in government contracts by the end of the year which will lead to an asking price increase.
